

**Capacitor Value Guide**

0.022µf - Good all-rounder, bright and clean. Used in many modern production instruments

0.047µf - More treble roll-off, with a warm and full tone especially with overdrive and gain

0.1µf - Used in 50s and early 60s instruments - Most high end roll off, can be “wah” like.

# HSS 1V 1T L5

1 Volume Pot, 1 Tone Pot, 5-Way Blade (No Split in Position 2)
