

Note: This 50s/60s standard wiring will deliver a separate tone control for the neck and mid pickups, with no tone control for the bridge. For modded diagrams that include a bridge tone control, see tonerider.com/wiring

Capacitor Value Guide

- 0.01µf - least high-end roll off / brightest
- 0.22µf - good all rounder, our recommendation
- 0.47µf - More roll-off
- 0.1µf - Vintage 50's / Most high-end roll-off

3 STRAT PICKUP

1 VOL / 2 TONE / 5-WAY BLADE
